Creating mobile workforce using cloud computing technology

<https://www.techsoup.net.nz/learn/articles/creating-mobile-workforce-using-cloud-computing-technology-webinar>

Content: Highlighting cloud computing technologies not-for-profit organisations of all sizes are currently leveraging to become more efficient as well as providing two real-world case studies of organisations who are already reaping the benefits of embracing a mobility driven strategy. Traditional office based 9 to 5 jobs are a fast fading memory in most not-for-profit organisations. Staff are constantly on the go, spending more time working remotely, meeting clients and working out of hours. Now, many senior leaders are realising that these trends combined with cloud computing technologies can also be leveraged to make the organisation more efficient.
